Costs of Endangered Species – Do we Know What to Plan For ?

Planning Community of Practice Conference

Jim E. Henderson, ERDC-EL

May 20, 2008

Congressional Requirement

- *1988 Amendments to ESA "FWS shall submit to the Congress an annual report...[on a] species-by-species basis of all reasonably identifiable Federal Expenditures made primarily for the conservation of endangered and threatened species..."*

Corps Practice

- *Data call after completion of Fiscal Year*
- *Coordination through HQ, MSC, and Districts*
- *Guidance focused on labor expenditures*
- *HQ personnel changes led to fall through the cracks*

2004

- OMB and HQ Review of Missouri. River. Navigation Project

- Simmons and Frost ***Accounting for species: the true costs of the Endangered Species Act***
- "Reported ESA costs are highly underestimated"
  - Limitations of Current Reporting
    - Leave out private costs
    - Only report on implementation
    - Not all agencies reporting
    - State, local, and private costs not reported

Effects Determination

- **Effects Determination -** This category includes the personnel and contract services required to determine and plan for protection of TES. These costs include:
  - 1-1 Coordination and Determination
  - 1-2 Site Visits and Inspections
  - 1-3 Litigation and Office of Counsel Review
  - 1-4 Funding Transfers for Coordination and Effects Determination to Other Agencies, e.g., USFWS, NMFS, States; NGO
  - 1-5 Funding Transfers for Cooperative Studies or Research
  - 1-6 In-house research

ESA Protection and Conservation Measures

- The ESA Conservation and Protection Measures are the actions and management measures that account for (inventory, survey, and monitor) and protect ESA species and habitat, for constructed and operating projects. These costs include:
  - 2-1 Inventory, Survey and Monitoring
  - 2-2 ESA and Incidental Take Observers
  - 2-3 Protection - Species
    - -Avoidance
    - –Relocation

(continued)

ESA Protection and Conservation Measures (concl'd)

ESA Prot. & Cons. Costs (concluded)

- 2-4 Protection - Habitat
  - -Construction, Creation, Restoration
  - -Disturbance Prevention (signage, fencing)
- 2-5 Design for ESA Protection and Conservation Measures
- 2-6 Construction and O&M of ESA infrastructure, e.g. fish ladders
- 2-7 Land Acquisition
- 2-8 Funding Transfers for ESA Protection and Conservation Measures to Other Agencies, e.g., USFWS, NMFS, States
- 2-9 Environmental Stewardship Labor (OMBIL)

Equipment Costs

- This category includes equipment costs attributable to ESA requirements. Two components make up the category:

  - **3-1 Equipment Costs - Charges and Purchases**

  - **3-2 Equipment Modifications due to ESA requirements**

Other Costs for the Species
If there are costs that can be attributed to a species, but not covered in the above categories, these expenditures should be included here, with a brief description. Costs that cannot be attributed to a species or group of species are included in the Other Expenditures Worksheet.

- In the event a species expenditure doesn't fit the other four categories, the costs are included and described here.
- These are expenditures for species and groups of species. Expenditures that are for support of all species, and cannot be linked to a species or group of species, should be included in the Other Expenditures Input, from the Main Menu.

Other Expenditure Input

- **Other Expenditures not Attributable to a Species:**
  - **Supervisory Costs or Overhead**
  - **Training or Updates**
  - **Equipment (cameras, software, field equipment) for the TES program, not for single species or group of species**
- **Memphis Navigation reported $1000 in administrative costs.**
- **After entry of each "Other Expenditure" use the Submit function.**

Breakdown of Costs Between Corps Elements

- Complicated by who does the work vs. Corps function
- Estimation of Other Expenditures does “catch” costs, but doesn’t attribute them to an element

Reducing Uncertainty in Future Costs

- Limited by 3 years of data
- Activity location, magnitude, seasonality, institutional position affect costs; all vary from year to year
- Reporting inconsistencies
- Use of template as a framework to guide estimates of costs.
